## VELO™ 500 PROFESSIONAL COMPANION

Professional Companion

VELO

16MB

Introducing the Velo 500— the most powerful Handheld PC on the market today. Weighing less than 500 grams, this fully-equipped mobile computer puts the power of a PC in the palm of your hand. Whether you're in a conference room, on the airplane, or working late at the hotel, the Velo 500 provides the expandable support you expect, along with the superior performance and integrated communications you need. The Velo 500. Everything you need. Everywhere you go.

- With a 75MHz MIPS-based RISC processor and 16MB of memory, the Velo 500 delivers the highest performance architecture available in a Handheld PC.
- The Velo 500 runs Microsoft® Windows® CE 2.0, designed specifically for Handheld PCs. It comes complete with a variety of popular "pocket" applications from the Microsoft Office Suite, a database, and communications software.

■ Wide screen without a wide Handheld PC. The Velo 500 provides better screen readability in all mobile environments yet retains its small form factor.

■ Synchronise your calendar, contacts, to-do lists, e-mail, and documents between the Velo 500 and your desktop PC with the Velo Dock (included). You can even recharge batteries at the same time. With the Velo 500, you're prepared for any challenge that comes your way.

■ Access e-mail, send and receive faxes, surf the Web, or synchronise remotely with the optional, low-power modem, or by connecting the Velo to your GSM telephone

■ Expand memory, upgrade the operating system, and add accessories such as wireless modems with easy-to-install Miniature Cards and Velo V-Modules. The Velo 500 can keep up with your needs.

The Velo 500 is the only tool you need to take when you leave your desktop PC behind. With the Velo 500, you can write memos, take notes, analyse numbers...connect to your Windows 95 desktop or Windows NT® Workstation...run custom applications...send and receive faxes and e-mail...even surf the Web. Everywhere you go.

Let's make things better.

# VELO 500

## Audio in

Omnidirectional microphone and Velo Voice Memo enable you to record ideas and reminders.

## Velo Voice Memo

Just press the button and talk into the microphone. With Windows® 95-compatible sound compression, you can record up to 16 minutes per MB. You can even attach recordings to e-mail.

## High-performance 3.3V 32-bit MIPS-based Philips PR31700 RISC processor at 75MHz

Designed for fast access and high throughput of Windows CE applications. With fast on-board memory, the Velo 500 includes 16MB EDO DRAM and 16MB Fast Page Mode ROM.

## DC jack

for external power and recharging (12V at 500mA)

## High-speed I/O

RS-232 serial port

## Weight 425 g

(with batteries)

## IrDA infrared transceiver

(transfer information up to 115Kbps) You can send files or messages to other Hand-held PCs, synchronise with your notebook, and print to IrDA-compatible printers.

## Power (battery compartment)

The Velo 500 runs on a NiMH rechargeable battery pack or optional AA batteries. The NiMH battery pack quickly recharges in less than 2.5 hours. Lithium backup battery keeps data safe.

## CR2032 lithium backup battery

## Expansion for V-Modules

Simply snap on an optional V-Module for additional functionality, such as VGA cards and wireless LANs.

17.3 cm

3.0 cm

9.6 cm

## Indicator lights

Let you know when the Velo 500 is charging or communicating.

## Low-power Optional data/fax modem

Enjoy faster and longer connections to your office, clients, or family. Surf the Web. Reach your server or desktop for remote synchronisation.

## GSM Connection

Make a connection to your GSM phone and enter the world of wireless communication.

## Backlit, non-glare touchscreen display

The Velo 500 display supports 16 shades of gray (640 x 240 pixels, .23mm dot pitch) and on-demand backlighting and contrast control.

## Stylus

Touch the screen and the Velo 500 is at your command.

## International Keyboard

Enter accented characters and other special characters in an easy way.

## Quick Start keys (10)

You can jump-start your applications with the touch of a key. (Keys can be reassigned to launch any application.)

## Audio speaker

Lets you play back your sound (.wav) files.

## Memory with room to spare

The Velo 500 comes with at least 16MB of memory. Additional DRAM, Flash, and ROM Miniature Cards can be installed if you need to expand even further.

## Miniature Card slots

Two industry-standard expansion slots for more DRAM, Flash memory, or ROM software upgrades.

## Included Software
